WARRANTY 1 YEAR

## CHARACTERISTICS & OPERATION

**Standard model**

- Panels up to 48" by 92" can be turned upside down in a few seconds, and then released to the next workstation in the manufacturing process.

**Huge model**

- Panels up to 72" width by 156" can be turned upside down in a few seconds, and then released to the next workstation in the manufacturing process.

The TR-180 is a compact solution when space or layout limitations prevent using the ATF-180.

## OPTIONS & SPECIFICATIONS

- Custom dimension units are available upon request;
- Conveyors inside barrel are powered by rollers or belts, to be selected while ordering based on the application.
