DTF-360 - DOORS & PANELS FLIPPER INSPECTION STATION

The DTF-360 Door & Panel Flipper Inspection Station is a roller conveyor integrated with a gripper system that allows the operator to rotate and stop the product at the desired angle for inspecting, cleaning, sanding or repair.

DTF-360

DTF-360 TURNING A DOOR TO BE INSPECTED

DTF-360

WARRANTY 1 YEAR

CHARACTERISTICS & OPERATION

A two-handed activation device allows the operator to rotate the door or panel on both sides. Once the operation is complete, the same activation device allows the door to be lowered onto the roller conveyor to process the next door.

- 360° rotation;
- Door or panel width: minimum 24" – maximum 48";
- Door or panel length: minimum 6' – maximum 10';
- Door or panel weight: maximum 300 pounds;
- Thickness : 1 ½" to 2".

OPTIONS & SPECIFICATIONS

Install a device that blocks the rotation of the unit while the operator inspects, sands or repairs the product.
