AIRBOR 735 PNEUMATIC COMBINATION BORING

The sturdy and compact Airbor 735 is a budget-priced vertical/horizontal boring machine performing with high precision and accuracy.

WARRANTY 1 YEAR

CHARACTERISTICS & OPERATION

- The sturdy and compact Airbor 735 is a budget-priced vertical/horizontal boring machine performing with high precision and accuracy.
- Operated by an air-oil system, the Airbor 735 is equipped with air hold-downs and adjustable front stops which firmly secure parts to the table. It can be used either in vertical or horizontal mode or in combined horizontal/vertical modes.
- Basic machine includes: an 18" wide X 36" long hardwood table, complete air/oil operation and controls of the vertical and horizontal boring, fast approach, two vertically adjustable 3" air-operated hold-downs and safety guard.
- The Airbor 735 is available in 3, 4 and 6 feet frames.
